# USAASA Reorganization

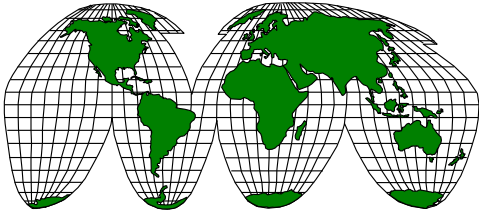

---

**What:** USAASA is reorganizing its field offices – DARRs

**Why:** The FAA Air Traffic Organization (ATO) is reorganizing and DARRs predominantly interface with the ATO as they work to preserve the Army's ability to access and freedom to maneuver in the National Airspace System (NAS). The ATO is reorganizing into three service areas: The Eastern Service Area, the Central Service Area and the Western Service Area. The service areas will each have a main office, or Center, located in Atlanta, Fort Worth and Seattle, respectively.

**When:** 31 Dec 2006 the official date established by the Commander of USAASA. It aligns with the date that the FAA's ATO expects to be completed with all of its related personnel moves. **All DARR offices will continue to provide services to their respective regions through December 2006.**

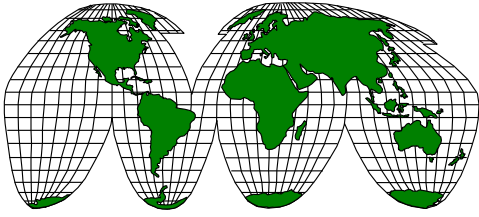

**How:** By migrating functions from the DARR offices of Eastern/New England (Boston), Central/Great Lakes (Kansas City) and Western/Pacific (Los Angeles) into the offices of the DARRs in Atlanta, Fort Worth and Seattle, respectively.

# Will This Change the Service I Receive?

---

- NO, it will not. However, it will change the physical location of the office you call for service, if you are located in the Eastern/New England, Central/Great Lakes, or Western/ Pacific regions
- DARR (Department of the Army Regional Representative) becomes Department of the Army Representative (DAR)
- All of the services and assistance you receive from USAASA will be uninterrupted
- USAASD-E will not be affected by this reorganization

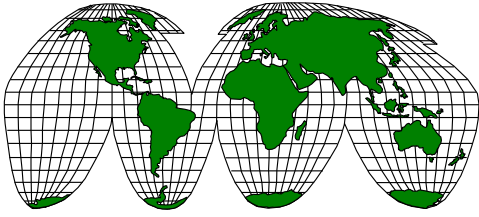

# What Will It Look Like?

---

## A Service Area Office:

- 1 x Lieutenant Colonel (LTC) and 2 Master Sergeants (MSG)
- The LTC is the respective Service Area DAR
- Each MSG will have a region/s of focus within their Service Area – for example, in the Eastern Service Area office of Atlanta, one MSG will focus on the Eastern and New England regions and one will focus on the Southern region
